Meeting Not

Since I can't do Zoom for the MPP meetings, (old computer) there won't be any minutes to report from next week.

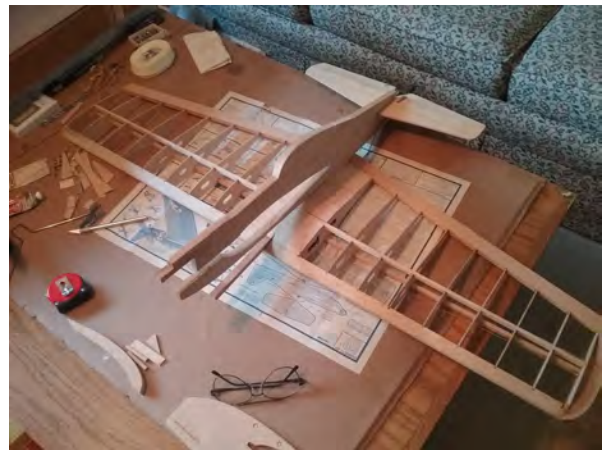

Jim Gevay

Flight Report

Jaydon and I went flying on Sunday, Dec. 6, 2020 cool day but had fun flying. The most unusual thing happened when Jaydon was flying. Half of the wing broke off on the ringmaster plane he was flying while in flight. Jaydon finished the rest of the 3 min. flight in level flight. This is a first

to both Jaydon and I. I will remember this for the rest of my life.
Jim Perry

Cosmic Wind

Attached are some pictures of a Comic Wind plane kit I am building this winter for next spring flying. Hope all are staying safe and warm this winter. See you next spring flying at the air field.

Jim Perry

New Member Interest

Hello Doug,

Thank you for contacting the Piston Poppers.

I am copying some of the most active members in this reply.

We would be glad to help you take a turn in the circle again. Brodak offers several ARF's. The ARF Ringmaster is a good one to fly, and a tough airplane too. www.Brodak.com

Club members also have airplanes you can fly or buy, from Cox airplanes to 35 size airplanes. I have several you are welcome to fly.

You also are welcome to come to our club meetings anytime. Our next one will be the last Thursday of January. You can find the location on the last page of the newsletter.

We might have a frozen fun fly on New Years Day, but the weather has to be warm (say 32 with little wind).

We have build sessions in the winter on the first Saturday of every month. It is a good time to see what people are building.

We also have a swap meet in the winter, but I can't remember when that is.

Hope you can join us,

Tom Sontag
